Here are sound samples accompanying the short paper: "MENU SONIFICATION IN A MOBILE PHONE - A PROTOTYPE STUDY" by Helle, Leplâtre, Marila, and Laine.

Short descriptions of the sounds:

- **audio1.wav, audio2.wav:** A pseudo-polyphonic version (audio1) of a polyphonic melody (audio2).
- **saudio1.wav, saudio2.wav:** Slower and shorter versions of audio1 and audio2, respectively. These samples are intended to clarify the pseudo-polyphonic approach.
- **audio3.wav:** Sonification of main menu items.
- **audio4.wav:** Pentatonic scale.
- **phone.wav:** The main menu sonification recorded from an actual phone.
